OBJECTIVE

MERN Full Stack Developer with 2+ years of production experience building and deploying scalable REST APIs and React applications on AWS. Delivered measurable results including 20% faster API response times and 25% system performance improvement across live applications. Seeking a full-stack developer role to architect and ship production-grade, cloud-native web applications.

WORK EXPERIENCE

MERN Full Stack Developer

Apr 2024 – Present

KodeBloom Technology and Services Pvt Ltd, Hyderabad, India

- Engineered and maintained scalable full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), serving 100+ active users and improving overall system performance by 25%.
- Designed and developed 10+ RESTful APIs using Node.js and Express.js, reducing API response time by 20% through optimized request handling and middleware architecture.
- Built responsive, accessible React.js user interfaces for 5+ modules with reusable component libraries, reducing UI development time by 20% across projects.
- Architected and implemented JWT-based authentication with role-based access control (RBAC), securing multiple user modules and eliminating unauthorized access vulnerabilities.
- Optimized MongoDB schema design and indexing strategies, improving database query performance by 30% and ensuring efficient data retrieval at scale.
- Integrated frontend and backend systems using Axios and Fetch API, reducing data latency by 25% and improving overall application responsiveness.
- Structured backend using MVC architecture and engineered reusable React components, reducing codebase duplication and improving maintainability across the development team.

EDUCATION

B.Tech in Information Technology

2020–2024

QIS College of Engineering & Technology

Class XII

2018–2020

Sri Sai Junior College

TECHNICAL SKILLS

Programming Languages:	JavaScript (ES6+), Python
Frontend:	React.js, HTML5, CSS3, Tailwind CSS
Backend:	Node.js, Express.js, REST APIs, JWT, Microservices
Databases:	MongoDB, PostgreSQL, SQLite
Cloud & DevOps:	AWS (EC2, S3, IAM, Lambda), Docker, Vercel, Netlify, Render, MongoDB Atlas
CI/CD & Tools:	Git, GitHub, Docker, VS Code, Postman, CI/CD Pipelines, Agile, Scrum

PROJECTS

School Management System | [GitHub](#)

- Developed a full-stack School Management System with separate dashboards for Admin, Teacher, and Student roles.
- Implemented secure JWT authentication with role-based access control, protecting 3 distinct user modules.
- Built 15+ RESTful APIs using Node.js and Express.js for managing students, courses, attendance, and results.
- Optimized MongoDB schema design with indexing, reducing query response time by 30% for large datasets.

College Management System | [GitHub](#)

- Developed a full-stack College Management System with separate dashboards for Admin, Faculty, and Student roles, enabling efficient management of student records, faculty information, and courses.
- Built 12+ RESTful APIs and optimized MongoDB schema design and queries, improving data retrieval performance and ensuring efficient management of academic data.

AI Chatbot |

- Developed a full-stack AI Chatbot that provides real-time AI-powered responses to user queries and delivers an interactive conversational experience.
- Integrated AI services with secure user authentication and chat history management, ensuring personalized conversations and efficient data retrieval.
